

2011 TAX CREDIT

**Award-winning Technology,
Design and Performance!**

**CENTRAL BOILER
E-CLASSIC
2400**

- High Heat Output Rating
- Low Emissions
- High Efficiency Rating Means Less Wood
- Largest Firebox Door
- LED Lights

2010 VESTA Award - Wood Products Category
This award honors innovation in design and technology. The E-Classic 2400 was awarded the Vesta award based on features such as the eco-friendly LED lights, three-stage innovative combustion technology, FireStar electronic controller, and Power Ignition. The E-Classic 2400's award-winning performance includes its extremely low emissions and 260,000 Btu/hr rating.

Highest Heat Output
The E-Classic 3200 has an efficiency rating of 97%. With its 305,000 Btu/hr rating and emissions rate that is one-fourth of the emission limit set forth in the EPA Phase 2 Program, there is no cleaner outdoor furnace with this amount of heat output.

97% EFFICIENT
EPA PHASE 2 PROGRAM QUALIFIED

*There is no cleaner outdoor furnace with this amount of heat output!**

*Highest Heat Output Rating and Lowest Emissions based on EPA website data, Nov. 11, 2010.

2011 TAX CREDIT

Biomass Heating Appliances Tax Credit Extended

Included in the tax package passed into law on December 17, 2010 was the extension of a tax credit for biomass heating appliances that was set to expire on December 31, 2010. Although the tax credit for biomass heating appliances will be extended through 2011, Congress did decrease the benefit to consumers. The new tax credit has the following provisions:

- Credit is 10% for the purchase of a biomass heating appliance in 2011, with a maximum credit of \$300.
- Credit applies to the purchase price only (installation costs are not included).

How to Qualify for Tax Credit

1. Purchase and place in service a qualifying Central Boiler outdoor furnace between January 1, 2011 and December 31, 2011.
2. Save the purchase receipt and the manufacturer's certification statement for the furnace purchased.
3. Claim the tax credit associated with your qualifying purchase on your federal filing for the 2011 tax year.

Details of the Tax Credit

1. Tax credit is 10% of the amount paid for the qualifying product (installation costs cannot be included) up to a maximum of \$300.
2. The credit applies to the homeowner's primary residence only.

3. A tax credit is a dollar-for-dollar reduction subtracted directly from your tax liability. Therefore, \$300 can be subtracted directly from the amount of tax that is owed, or added to the tax refund.
